

# Conventional vs optimized approach to finding AF for TIA clinics

A pathway and timeline comparison

## Typical **outpatient** TIA pathway

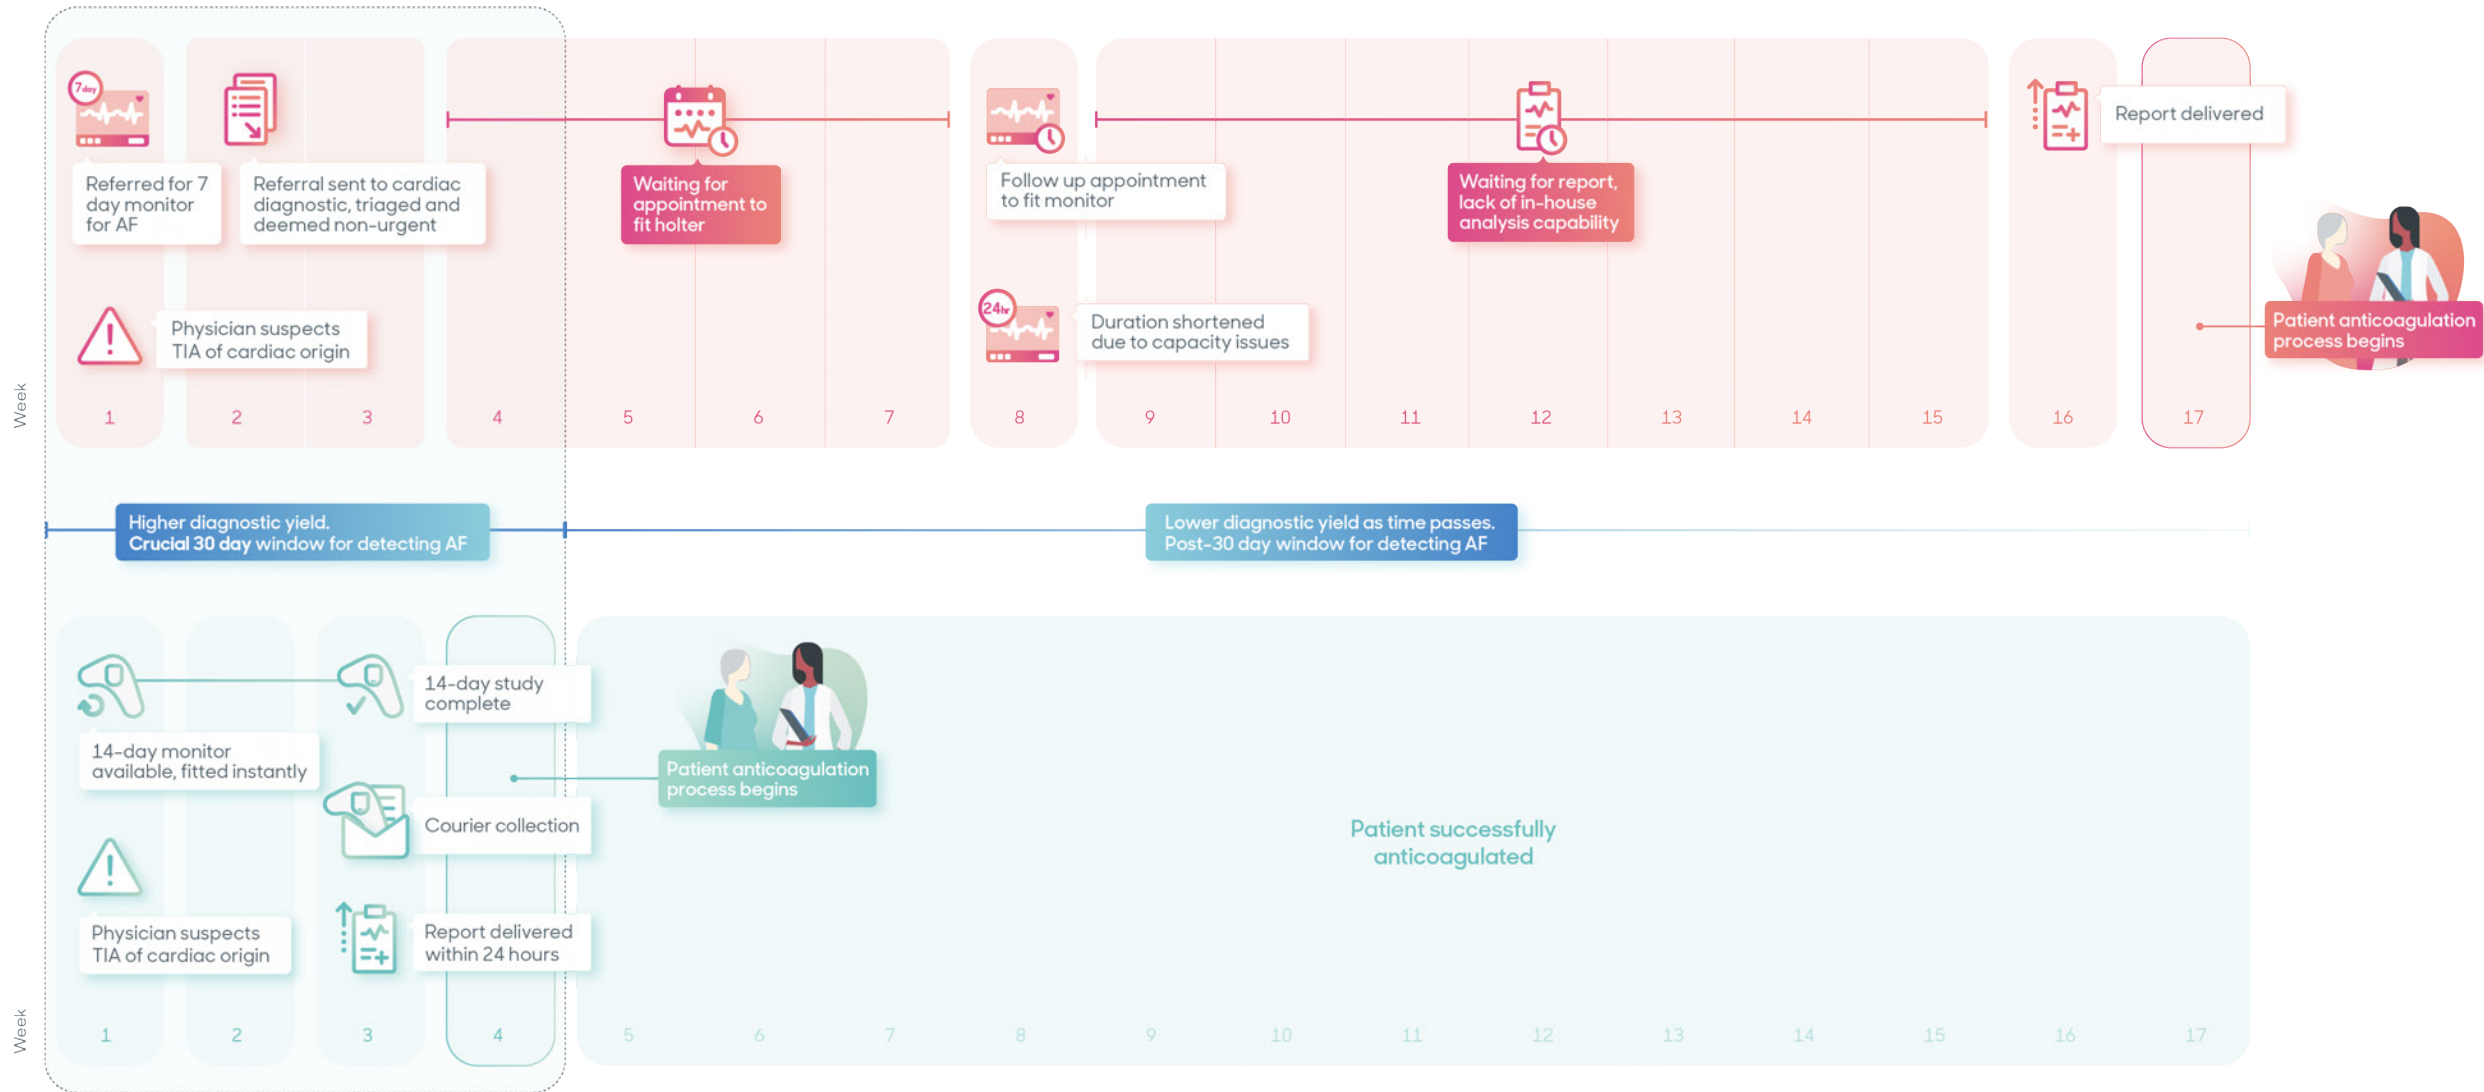

- 1 Patient attends TIA clinic.  
TIA suspected of cardiac origin.
- 2 Doctor refers patient for 14-day Holter to rule out AF

## Optimized **outpatient** TIA pathway with CardioScan

Typical **outpatient** pathway over time

CardioScan optimized  
**outpatient** pathway over time

# Free 20-patient trial for all UKSF attendees.
