

CPT Codes

Quick Reference Guide for Extended Wear Holters

Holters with monitoring lengths of 3–7 days and 8+ days are fully covered by Medicare, Federal and Private insurance plans.

Below are the codes you will need to use when billing for Cardiac Monitoring Services.

You can find more information, including a handy reference guide of ICD-10 codes, by visiting: cardiacmonitoringservice.com/flexible-billing-solution/

Multiday monitoring detects arrhythmias that would have been missed with 24hr monitoring

Key Information

- Extended monitoring up to 14 days is covered by all insurance plans with the relevant ICD-10 codes
- A 1–2 day monitoring period could be failing to pick up an arrhythmia around 50% * of the time.
- CMS can provide you with data reports about detection rates, day of significant findings and even demographics.

Only available upon request

Service	Who bills for each code	Only available upon request		
		1–2 days Up to 48hrs	3–7 days More than 48hrs, up to 7 days	8+ days More than 7 days, up to 14 days
Holter Placement/Removal Professional Component	Dr. Office, Clinic, Hospital	93225	93242	93246
Scanning/Analysis with report Technical Component	Cardiac Monitoring Service	93226	93243	93247
Interpretation of test results Professional Component	Interpreting Clinician	93227	93244	93248

* Review of all patients prescribed a 7–day CMS Holter Jan 2021 to Apr 2022, where either Pauses, Paroxysmal AFib or VT was found during the wear period. Patients were selected from USA and UK.

More Information About Medicare EWH

Traditional Holter Should Be Largely Unaffected

Changes to Extended Wear Holter (EWH) reimbursement structures will not change traditional 24hr Holter test reimbursements.

Non-Physician Providers Will Be Able To Supervise Diagnostic Testing

CNM, CNS, NP, and PA are able to prescribe and bill for EWH services.

Billing Options Under The Medicare CPT Codes

Extended Wear Holters are provided within our flexible billing structures, including Split Billing, Fee for Service or even specialized billing set up to suit clinic needs.

- **Split Billing** – You charge for hook up and report interpretation (Professional Components) of the test, and we charge for the scanning and analysis report (Technical Components)
- **Fee For Service** – We charge you a flat fee per patient, and you bill the insurance companies for all stages of the test (Global Billing)

Full Service Cardiac Monitoring

As a full-service provider, we provide traditional and Extended Wear Holters, Event and Telemetry monitoring and Ambulatory BP services with reports on our leading cloud platform, combined with cardiac device management and 24/7 US-based customer care.
