Dr Harry Mond has dedicated his career and life to advancing cardiology, as a leading global expert in pacing, pacemaker implantation and electrocardiograph interpretation.

He is now retired from implantation but continues in private practice, and remains committed to research and education, lecturing worldwide. As a founder and Medical Director at CardioScan and Cardiac Monitoring Service, Dr Mond leads an international team of cardiologists and cardiac technicians in reviewing more than 500,000 cardiac studies each year.

Medical Director Assoc Prof Harry Mond is a founding member of CardioScan and remains among the world's top experts in the interpretation of ECG and Holter studies.

As an international educator and author of 275+ peer-reviewed manuscripts and books, he provides regular training and professional development to our team of certified cardiac technicians to ensure the highest clinical standards..

Career Accomplishments

Chairman Australian Standards Association Committee on Pacemakers

International Standards Association Committee on Cardiac Pacemakers ISO 5841/1

Coordinator World Survey of Cardiac Pacing and Electrophysiology

Foundation committee member of NASPeXAM (IBHRE)

Board member, WSA (formerly, International Pacing and Electrophysiology Society)

Board member, Heartbeat International (retired)

Senior editor PACE journal, and numerous editorial boards of electrophysiology journals

Specialist Physician Dept of Cardiology, Royal Melbourne Hospital

Associate Professor Dept of Medicine, University of Melbourne

Honorary Adjunct Associate Professor, Dept of Epidemiology & Preventive Medicine, Nursing & Health Sciences, Monash University

Development of the Mond Stylet for right ventricular septal pacing

Cardiac Monitoring Service's team of cardiac technicians meet the highest compliance and analytical standards, while delivering the latest heart monitoring software and devices.

Over 30 years of reputable and trusted cardiac monitoring

500k hearts analysed and reported on each year

Trusted by medical experts in 8 countries worldwide
